

BERKUT ECHNOLOGY ENVIRONMENTAL AND SUSTAINABILITY POLICY

Berkut Technology shapes its environmental efforts in line with the United Nations Global Compact and the United Nations Sustainable Development Goals. The company's environmental management principles include principles and standards defined on the basis of international agreements, standards, initiatives, and national legislation, in compliance with the environmental legislation of the countries in which it operates.

Berkut Technology develops and implements environmental policies compatible with these policies and strategies, taking into account sectoral expectations and needs. The company provides central coordination to determine environmental management strategies, procedures, and standards.

POLICY IMPLEMENTATION PRINCIPLES

Berkut Technology;

Ensures full compliance with environmental regulations and other obligations in the geographies where it operates. The company sets targets aimed at continuously improving its environmental performance, plans actions, monitors results, and strives for continuous improvement.

Evaluates the environmental impacts of new investments and ensures the establishment of environmentally friendly businesses, environmental protection, emergency, and environmental risk management. Additionally, it combats the climate crisis by considering climate-related risks and opportunities and implements activities supporting the transition to a low-carbon economy.

Prevents waste generation, reduces waste, increases recycling, recovery, and reuse in accordance with the principles of the Circular Economy. It reviews design processes considering these principles and prioritizes the use of waste as resources as much as possible.

Focuses on protecting, continuously improving, and developing ecosystems, habitats, and biodiversity in the areas it operates. It encourages employees, dealers, authorized services, suppliers, subcontractors, and other operational stakeholders to reduce environmental impacts.

Communicates and collaborates with relevant institutions in developing regulations, other requirements, policies, and standards related to environmental management. It closely follows innovations and developments related to environmental management worldwide and integrates good practice principles and standards into business processes.

Aims to be a leader in the environmental field in the sectors it operates, shares good practices, develops and spreads collaborations. Berkut Technology employees are obliged to comply with and improve this policy. It takes necessary steps for business partners to comply with this policy and improve their environmental performance.

This Policy is updated and implemented by the Corporate Communications Department of Berkut Technology.
